Meeting Report

Meeting Minutes

Date: September 14, 2023

Time: 11:00 PM - 12:30 AM

Attendees:

1. Talha
2. Ahmad
3. Furkan

Agenda:

- ### Project Scope:

We've finalized the scope of our project, which is the development of a web application using the React framework. This application will serve as our primary focus.

- ### Development Approach:

After considering various options, including cross-platform app development with Flutter, we collectively decided to pursue web development using React.

- ### Assigned Tasks:

Talha: Talha will deliver into GitHub Actions, aiming to understand how it can automate and streamline various aspects of our development and deployment processes.

Ahmad: Ahmad will be exploring Drone CI, evaluating its compatibility with our project's continuous integration requirements.

Furkan: Furkan will investigate Gitlab CI/CD to determine how it can be seamlessly integrated into our workflow for automating testing and deployment procedures.

- ### Next Steps:
  In our future tasks, we will focus on cloning an existing Git project to facilitate collaborative development. Additionally, we'll outline the deployment process for our web application.

- **Deliverables:**
Our agreed deliverable is a comprehensive comparison report. This report will provide insights into the strengths and weaknesses of the DevOps tools we're researching. It will be a vital resource for us in making an informed decision regarding the tool selection.

- **Conclusion**

The meeting concluded at 12:30 AM on September 15, 2023. Our next step is to convene for our upcoming meeting to share our research findings. Subsequently, we will commence the development phase of our web application project.
